

RAPID REORDER

WHAT

Rapid Reorder™ is a reorder solution that streamlines your ordering process, ensuring your redemption items are never out of stock. It works with most card reader systems to automatically add redeemed merchandise to your cart for review.

The difference between Rapid Reorder™ and other solutions in the industry is it gives you the final say in what actually gets shipped to your location. **It gives you the freedom of choice**, plus the convenience of a pre-built cart based on your redemption data.

HOW

The system preloads your shopping cart based on merchandise par levels. **You can then edit the cart as you see fit.** Check out and you're done!

WHY

Using Rapid Reorder™ will save you an average of 45 minutes a week in ordering time, all while giving you control over what product ends up in your assortment.
